

**Latest Proven Technology
To Achieve Your Requirements
and Fit Your Budget**

We have your heavy duty coating needs covered,
whether . . .

High Acid/Temperature Resistance
High Abrasion/Impact Requirements
Anti-Static or Dust Control Only

Restoration or New Construction

Floors or Walls
Interior or Exterior
Concrete or Steel

Clean Rooms
Production/Assembly Areas
Warehouse Floors
Show Rooms
Kitchens/Cafeterias
Carparks
Mechanical Rooms
Plating Operations
Hallways and Offices
Tanks & Steel Structures

**You Benefit With
Polymer Systems from FIRST**

Reduce your costs, maintenance costs and
frustrations with . . .

the longest lasting,
most chemical resistant, and
easiest to clean
solvent-free epoxies available,
including hi-build anti-static.

You get flooring that does not come-up, as well as
complete Turnkey and Local Support.

**Your expectations and wants achieved =
Total Peace of Mind**

**"We have taken
seamless epoxy flooring
to a New & Higher Level!"**

**Heavy Duty
Epoxy Floor & Wall Systems
For Concrete and Steel**

High Performance Polymer Systems

As flooring and coatings consultants/applicators, FIRST brings to you the best polymer systems selected from some of the leading U.S. Formulators, including:

ROCK-TRED CORP:

AGUA-POXI - high solids water-based epoxy for floors and walls. Excellent as Primer for all coatings.

POXI-ROCK Seal/Coat - 100% solids, solvent-free, high gloss, chemical resistant epoxy coating (10-50 mil thick Systems).

POXI-ROCK II - 1.0 to 4.0 mm thick, heavy duty laminated toppings, using the Seal/Coat coating.

NOVO-POXI Dressing - 100% solids, solvent-free, high acid and temperature resistant novolac epoxy coating (15-60 mil thick Systems).

NOVO-POXI II - 1.0 to 4.0 mm heavy duty laminated toppings, using the NOVO-POXI Dressing.

Extra Heavy Duty, 3.0 to 9.0 mm SLR and Resurfacer Systems using the POXI-ROCK or NOVO-POXI coatings.

RT-2000 - water emulsion, solvent-free aliphatic urethane for dust-control or maintenance of epoxy flooring.

MONOTOP Resurfacer - heavy duty acrylic/cement for leveling . . . lower cost than using epoxies.

SAUEREISEN:

ConducCoat, ConducTop and Conoglaze - high-build ESD and Conductive, 100% solids seamless flooring, 15 to 50 mils thick . . . not thin film like others. Very easy to maintain and durable like all 100% solids epoxies.

GULF COAST:

Steel and Concrete Primers - will even bond to tight rust.

Glass-Filled and Ceramic-Filled Epoxies for the highest abrasion resistance for concrete/steel floors and tank liners

Ceramic-Filled Novolac Epoxies for maximum chemical resistant liners.

Urethanes and High-Solids Epoxies for steel structures, tank exteriors, and carparks.

Elastomeric Epoxy Membrane for waterproofing.

Elastomeric Acrylic to beautify and waterproof exterior walls, 800% elongation.

Acrylics for interior and exterior walls.

No matter your industry, environment, and/or application, we have you covered, including over damp concrete, oil soaked floors, and tiles.

OUR MISSION

To provide the solution to your flooring and coating problems; and, first-rate installation, service and materials where you can realize the greatest value from our relationship.

INSTALLATION

We are available to work at anytime to your convenience.

For your peace of mind, work is done under strict dust and odor control using the latest technology to do your project right the first time.
